

Wir stellen also bereits heute schon vielfache Auswirkungen des Klimawandels in Bolivien fest und es wird deutlich, dass die Bäuerinnen unmittelbar betroffen sind. Dies wird dadurch verstärkt, dass immer mehr Männer auf der Suche nach Arbeit in die Städte wandern. Die Frauen bleiben zurück und tragen die alleinige Verantwortung für die Ernte und die Ernährung der ganzen Familie.

Andrea Guzmán, Bolivien

(WWF. <https://ogy.de/andrea-guzman>)

First, when the November rains failed, we thought we could manage till this April, but the monsoon failed and everything has gone dry.

Sarojini Ariyapala, Sri Lanka

(Reuters. <https://ogy.de/sarojini-ariyapala>)

We want to show environmental defenders can use litigation as a tool and we want the UN to build up the capacity to enforce environmental law in courts around the world. Defenders are often treated as criminals or people who are hostile to development. That is not the case.

Phyllis Omido, Kenya

Alles was ich verlange ist, dass
die industriellen
Emissionen und all diese
zerstörerischen
Aktivitäten aufhören. Denn
wenn das nicht passiert, werden
unsere Probleme noch größer.

Penina Moce, Fiji

(WWF. <https://ogy.de/penina-moce>)

**We want women to continue
to contribute to solutions
and to shape their futures,
not return to the default
position of victims or
recipients of hand outs.**

Olanike Olubunmi Olugboji, Nigeria

I realized I had a commitment and an obligation to my people. I really trained myself in leadership, and now, I feel like I am able to really achieve great things.

Neris Uriana, Kolumbien

(PRI. <https://ogy.de/neris-uriana>)

Weak gender responsive policies and heteronormative systems and structures that discriminates many vulnerable communities such as LGBTQI, Disabilities, Sex Workers, Elderlies, Single Mothers etc from accessing equal services still exists, for example, during Cyclone Winston, many vulnerable communities were excluded from accessing government's assistance because it's only designed for families meaning husband, wife and children.

Maria Nailevu, Fiji

Women should all get together, nationally and globally. We need all groups to get organised and work from the grassroots.

Magdalena Alanoca Anchapuri, Bolivien

(Democracy Center. <https://ogy.de/magdalena-brigida>)

If women held
fifty percent or more
of the power, then
things would change.

Magdalena Alanoca Anchapuri, Bolivien

We can take on
responsibility,
be an authority.

Magdalena Alanoca Anchapuri, Bolivien

The biggest challenge
is finding water for our
livestock right now. We're
the last few shepherds
out here.

Lorraine Herder, USA / Navajo

Lasst die Kohle im
Boden – für mehr
Klimagerechtigkeit.

Hindou Oumarou Ibrahim, Tschad

Die Industrieländer sind für
den Klimawandel
historisch verantwortlich.
Aber sie sind nicht so stark
davon betroffen wie wir. Das
ist die große Ungerechtigkeit.

Hindou Oumarou Ibrahim, Tschad

Mehr als 80% der Menschen im Tschad lebt von dem, was der Boden ihnen gibt. Durch den Klimawandel ist ihre Ernährung immer weniger gesichert.

Hindou Oumarou Ibrahim, Tschad

(Oxfam. <https://ogy.de/hindou-ibrahim>)

Nowadays when we plant in
the month that we always
used to plant it is no good.
We have rains that are too
heavy or the dry season
that is too strong.

Francisca Dias de Nascimento, Brasilien

We have the women
losing their crop, losing
their income. I really
feel I am fighting for
gender equality.

Dr. Flower Msuya, Sansibar

(Pulitzer Center. <https://ogy.de/flower-msuya>)

Um den Klimawandel zu bekämpfen muss aber das Ziel sein, eine große und globale Solidarität zu entwickeln.

Donata Etsi, Togo

(WWF. <https://ogy.de/donata-etsi>)

Nowadays, women dare to talk about questioning a government official, and share tips on how to adapt crops to changing weather and improve their livelihoods. Now they are looking to create strategies.

Dina Juc Suc, Guatemala

(CSmonitor. <https://ogy.de/dina-juc-suc>)

All of us women,
united. We have to
unite. With unity
we will succeed.

Brígida Curo Bustincio, Bolivien

We know that transnational mining companies are affecting our environment. They have consequences for education, for health, for our land, and for agriculture.

Brígida Curo Bustincio, Bolivien
